ECLIPSE | Treatment Planning System

WHEN PLANS ALIGN, SO DO TREATMENTS.

Eclipse™ treatment planning system is a comprehensive solution that allows you to quickly customize treatment plans for a wide variety of disease sites with precision and accuracy.

Designed for quality, efficiency and consistency, feature-rich Eclipse simplifies advanced treatment techniques, enabling growing clinics to offer advanced patient care and services.

By integrating Eclipse with the ARIA® oncology information system and Varian delivery platforms, you can take advantage of a seamless workflow that can reduce data transfer errors and raises the bar for patient safety.

As Varian takes radiation treatment delivery to the next level, Eclipse is developed hand in hand, providing your clinic access to cutting edge technology for high quality patient care that endures.

QUALITY

Perform advanced treatment techniques that feature modern optimization and advanced calculation algorithms. With Eclipse as a springboard to collaboration, your multidisciplinary team can work together more efficiently applying an optimal planning approach for each patient.

- Generate 4DCT verification plans and RapidArc™ risk of re-irradiation applications from virtually any location with secure network access.
- Streamline your planning process with structured protocol templates.

CONSISTENCY

Standardize your workflow with SmartSegmentation™ knowledge-based contouring tools that facilitate the definition of targets and organs at risk. Providing objective statistical information to support re-planning decisions, Eclipse offers a host of tools in SmartAdapt™ deformable registration to improve consistency and potentially reduce error. Maintaining this consistency from one system to another helps ensure that Eclipse delivers what's needed for today's innovative treatment techniques. Execute the optimal treatment plan every time using RapidPlan™ pre-configured plan models on Eclipse to develop patient specific optimizations.

Seamlessly import treatment plans and create new plans all in one system. Eclipse integrated tools support consistency and allow for planning across numerous linear accelerators, equipment, and software.

- Navigate effectively across different planning workspaces with consistent icons and interfaces
- Limit variability and potentially reduce planning time using RapidPlan knowledge-based planning for individualized cases. With Eclipse adhering to the level of planning is an easy task with minimal impact on your clinic.

EFFICIENCY

Eclipse is an open, multi-modality planning system that advances dose accuracy and quickly integrates new developments as they become clinically available. Providing greater access, control and efficiency, Eclipse brings together the multiple steps of the treatment planning process allowing you to access virtually all records and dosimetry information from one system.

Enhance productivity with a powerful suite of intuitive software tools that enable you to plan faster and with greater confidence.

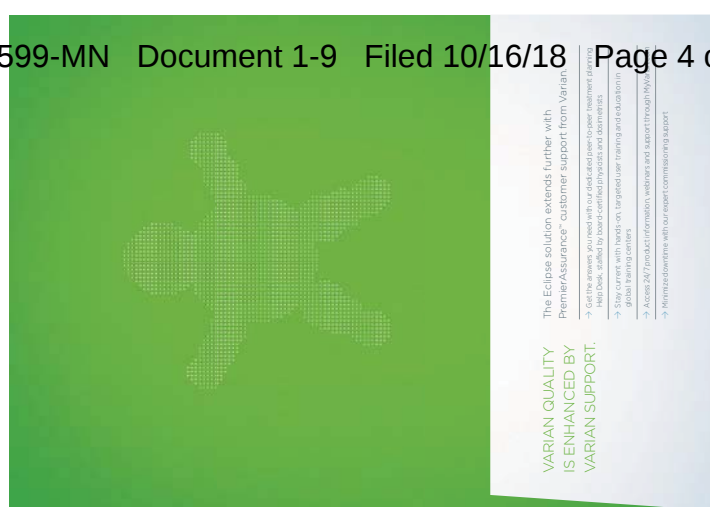

- Boost productivity with an intuitive Windows-based interface that uses simplified data entry and easy drag and drop functionality
- Connect to multipathing devices necessary for planning using DICOM RT architecture

VARIAN QUALITY IS ENHANCED BY VARIAN SUPPORT:

The Eclipse solution extends further with PremierAssurance™ customer support from Varian.

- Get the answers you need with our dedicated web-based "EclipseAssure" Help Desk, staffed by board-certified physicists and dosimetrists.
- Stay current with hands-on, targeted user training and education through global training centers.
- Access 24/7 product information, webinars and support through MyEclipse.
- Minimize downtime with our expert commissioning support.

A partner for life

Intended Use Summary

Varian Medical Systems' linear accelerators are intended to provide stereotactic radiosurgery and precision radiotherapy for lesions, tumors, and conditions anywhere in the body where radiation treatment is indicated.

Safety

Radiation treatments may cause side effects that can vary depending on the part of the body being treated. The most frequent ones are typically temporary and may include, but are not limited to, irritation to the respiratory, digestive, urinary or reproductive systems, fatigue, nausea, skin irritation, and hair loss. In some patients, they can be severe. Treatment sessions may vary in complexity and time. Radiation treatment is not appropriate for all cancers.
